SUMMARY

Backend Developer with hands-on experience engineering RESTful APIs and production backend systems using Node.js, Express.js, MongoDB, PostgreSQL, and MySQL. Skilled in building secure, scalable services with Redis caching, BullMQ background job processing, JWT authentication, and Stripe payment integrations. Proven ability to design and ship full-stack SaaS and e-commerce platforms independently, from database schema through deployment on Vercel and Railway.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, SQL
Backend: Node.js, Express.js, RESTful APIs, OOP, MVC Architecture
Databases: MongoDB (Mongoose), PostgreSQL, MySQL
Caching & Queues: Redis (Caching, Distributed Locks), BullMQ (Background Workers, Cron Jobs)
Validation & Security: Joi Schema Validation, JWT (HTTP-Only), RBAC, Bcrypt, SHA-256 Hashing
Testing & Docs: Vitest (Unit & E2E Testing), Postman, OpenAPI / Swagger
Tools & Cloud: Docker, Git, GitHub, VS Code, Railway, Vercel, Stripe API & Webhooks, Cloudinary

WORK EXPERIENCE

Backend Developer Apprentice / Intern, Outscalars (Pvt) Ltd

Jun 2026 - Aug 2026

Rawalpindi, Pakistan

- Engineered modular RESTful APIs with Node.js and Express.js, applying MVC and OOP design patterns.
- Implemented JWT authentication, Bcrypt password hashing, and SHA-256 encryption to secure user data.
- Built BullMQ and Redis background worker pipelines to run scheduled cron jobs and automated reminder emails.
- Integrated Redis caching to reduce database read latency and increase API throughput.
- Configured Stripe Checkout with cryptographic webhook verification to automate order workflows.
- Enforced request validation using Joi schemas and authored interactive OpenAPI (Swagger) documentation.
- Achieved high code reliability through Vitest unit/E2E test suites and Postman API testing.

PROJECTS

AppointFlow - Multi-Tenant Appointment Booking SaaS

Next.js 16, React, Node.js, Express, MongoDB, Redis, BullMQ, Stripe, JWT, Railway, Vercel

- Architected multi-tenant data isolation with granular RBAC for Owner, Staff, and Customer roles.
- Implemented Stripe Checkout and webhooks with Redis distributed hold-locks to prevent booking race conditions.
- Built BullMQ workers for 24-hour appointment reminders, weekly analytics, and automated slot allocation.

HM Sports - E-Commerce & Inventory Platform

Node.js, Express, MongoDB, Redis, Stripe, Cloudinary, JWT, Joi, Vitest, Railway, Vercel

- Optimized catalog reads to sub-millisecond response times using Redis caching with real-time cart handling.
- Automated the Stripe webhook lifecycle for stock deduction and payment verification.
- Secured 19 endpoints with JWT and Joi validation; achieved a 100% pass rate across 52 Vitest automated tests.

LibHub - Full-Stack Library Management System & REST API

Next.js 16, React 19, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Swagger, Vercel

- Developed 15+ REST endpoints with OpenAPI/Swagger documentation and dual-role JWT authentication for Admin and Member users.
- Implemented a real-time book borrowing and return workflow with copy tracking and circulation analytics.
- Built a Next.js 16 frontend featuring debounced catalog search and skeleton loading UI.

EDUCATION

Bachelor of Science in Software Engineering, PMAS Arid Agriculture University, Rawalpindi

Sep 2025 - May 2029

CGPA: 3.71 / 4.00

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Web Technologies, Programming Fundamentals
